Professional Summary

Data Analyst | BI Developer with 1 year and 3 months of experience in an industrial environment (excluding internships). Proficient in Power BI (Desktop/Service/DAX/M) and Sage X3 ERP integration, I work from BI architecture to business modeling across cross-functional areas: finance, purchasing, inventory, production, sales and agricultural monitoring. Currently pursuing an engineering degree in AI & Data Science, I turn raw data into dashboards that drive decisions.

Professional Experience

Data Analyst | BI Developer

Jul. 2025 — Oct. 2026

SICAM Tunisia

1 year 3 months

BI Architecture, Governance & Power BI Administration

- Deployed an enterprise BI infrastructure (1 DEV license → 1 TEST license → 4 PROD licenses)
- Administered Power BI Service (gateways, RLS, business access) and structured the license portfolio → maximized ROI

Spare Parts/Consumables Inventory Dashboard

- Consolidated data from Sage X3 (ERP) and Coswin (CMMS) into a multi-company model (Procan, Sicam)
- Developed calculated DAX tables: ABC classification (Pareto 80/20), dynamic segmentation and visual highlighting of stockouts/overstock

Purchasing Dashboard

- Strategically monitored the full supply chain (purchase requests, purchase orders, receipts, invoicing, payment)
- Identified bottlenecks and tracked purchase spend by supplier/item

Sales Dashboard & Sales Cube

- Developed a decision-support dashboard (revenue, margins, trends by customer, item, family)
- Built a semantic sales cube for self-service analytics for the sales and sales administration teams

Power BI Usage Pipeline & Governance

- Automated data extraction via the Microsoft Activity Log API
- Built an IT department report measuring license ROI and optimizing consumption per user (IP / license / project)

Finished Goods & Packaging Inventory

- Created a multi-department decision-support report (management, finance, marketing) replacing manual extractions
- Managed finished goods/packaging stock by batch and date → single source of truth, saving at least 1 hour per day

Finance Automation

- Power Automate trigger eliminating manual reporting of bank balances
- Instant and reliable distribution from Power BI to the finance team

Financial & Industrial Steering

- Built financial dashboards (balances, discounts, cash flow) via Sage XRT and industrial dashboards via REST APIs

Final-Year Internship | AI & Data Warehousing

Feb. 2025 — May 2025

Tekboot Solutions — Brussels

Graduation project

- Implemented a Data Warehouse centralizing HR data for recruitment KPI analysis
- Automated processing of unstructured documents (MongoDB, Python)
- Intelligent LLM-based matching engine (OpenAI, LangChain) for candidate scoring
- Implemented a RAG model to explain the matching score assigned to each CV, making shortlisting decisions transparent

Web Development Internship

Jun. 2024 — Aug. 2024

Mobelite Labs

Professional internship

- Developed an e-commerce application for anime-themed design products using Symfony

Technical Skills

BI & Analytics: Power BI (Desktop/Service/DAX/M), Power Automate, Talend ETL, SQL Server (SSMS), PostgreSQL, Data Warehouse, Sage X3.

Data Analysis: Advanced SQL (CTE, window functions, optimization), Advanced Excel (PivotTables, Power Query), Descriptive Statistics, Data Visualization, Data Storytelling.

AI & Data Science: Python (Pandas, NumPy, Prophet), Deep Learning (LSTM), LLM (RAG, LangChain, OpenAI API).

Development & DevOps: Docker, Git/GitHub, Laravel (PHP), Symfony, MongoDB, REST APIs, Linux/Unix.

Education

Engineering Degree in AI & Data Science

iTeam University

2025 — Present

Flexible-schedule program

Bachelor's Degree in Business Computing

FSEG Nabeul

2022 — 2025

Specialization: Business Intelligence

Academic Projects

- Smart Library:** Django web application with an AI chatbot assisting document search.
- Budget Management System:** Collaborative solution (Node.js + PostgreSQL) for managing transactions, categories and automatic alerts.
