Tunisia

Professional Profile

BI Developer specializing in transforming complex data into strategic insights. Currently pursuing an Engineering degree in AI & Data Science at iTeam University with a flexible study schedule, I leverage my skills in dashboard design, ETL automation, and artificial intelligence deployment to optimize operational steering for businesses.

Professional Experience

BI Developer
SICAM Tunisia

July 2025 – Present
Current position

- Industrial Monitoring:** Developed BI reports for agricultural tracking and designed real-time dashboards for production line optimization.
- Finance & Treasury:** Created financial dashboards (balances, discounting, Working Capital) by extracting data from the Sage X3 ERP.
- Commercial Steering:** Analyzed Revenue vs Budget and automated commercial reporting for executive management.
- Automation & ETL:** Designed ETL pipelines in Python, consumed REST APIs, and managed SQL Server and MongoDB databases.
- Power BI Service:** Administered sharing environments, managed Gateways, and business-level access control.

Final Year Internship | AI & Data Warehousing
Tekboot Solutions — Brussels

Feb. 2025 – May 2025
Graduation project

- Developed an intelligent matching engine based on LLMs (OpenAI, LangChain).
- Implemented a Data Warehouse centralizing HR data for recruitment KPI analysis.
- Automated unstructured document processing using MongoDB and Python.

Web Developer Intern
Mobelite Labs

June 2024 – Aug. 2024
Professional internship

- Developed a specialized content management platform using Symfony.
- Optimized SQL query performance and software architecture.

Technical Skills

Business Intelligence & Analytics

Power BI (Desktop/Service/DAX), Power Automate, Talend ETL, SQL Server (SSMS), PostgreSQL, Data Warehouse.

AI & Data Science

Python (Pandas, NumPy, Prophet), Deep Learning (LSTM), LLM (RAG, LangChain, OpenAI API), Statistical Analysis.

Development & DevOps

Docker, Git/GitHub, Laravel (PHP), Symfony, SQL, MongoDB, REST APIs, Linux/Unix.

Education

Engineering Degree in AI & Data Science
iTeam University

2025 – Present
Flexible study schedule

Bachelor in Business Computing
FSEG Nabeul

2022 – 2025
Specialization in Management Information Systems

Academic Projects

- Intelligent Library:** Creation of a web application using Django integrating an AI Chatbot (Gemini API) for document research assistance.
- Budget Management System:** Collaborative tracking solution developed with Node.js and PostgreSQL, featuring transaction management, categories, and automated alerts.
- Auto Parts Sales Management:** Full-stack web application with inventory and billing management developed under Laravel (PHP).
- Car Rental System:** Robust desktop application with a JavaFX interface and SQL data persistence.
